

VISION 24S

In today's demanding market, efficiency, maximum performance and minimum costs are a must for success.

Agrologic is a leader in the climate control field and we have the experience needed to assist the grower in meeting these demands.

The well-known, field proven Vision controller is back in a new freshly designed, advance model.

The **VISION 24S** helps you control all your house inputs/outputs using only one controller.

Features:

- Suitable for Broilers, Breeders and Layers
- Easy to use friendly user interface
- Large graphic LCD display
- Suitable for all types of ventilation systems
- Built in temperature reduction and minimum ventilation curves
- Remote control - allows the farmer to take control via PC, Web, SMS or Smart Phone via our Cellink cellular communication and alarm unit.
- History of daily and flock parameters.

VISION 24S

 Light On/Off

 Feed Control

 Water Valve

 Air Inlet

 Cooling Curtain

 Cooling Pump

 Cooling Pad

 Multi Stage Fan

 Radiant/ Space Heater

 Alarm

Outputs

Inputs

Minimum ventilation curve
Temperature reduction curve

Water Meter

Static Pressure Sensor

Bird Scales Weighing Platform

CO₂ Sensor

Temperature Sensors

Humidity Sensor

Feed silo weighing

Inputs:

- Temperature sensors
- Humidity sensors
- CO₂ sensors
- Pressure sensors
- Water meter
- Feed counting
- Feed silo weighing
- Batch feeder
- Egg counters
- Bird scales
- Potentiometer

Outputs:

- Fans
- Circulation fans
- Heaters: radiant, space and variable output.
- Light systems
- Inlets
- Tunnel flaps
- Curtains
- Cooling systems
- Variable speed fans
- Feeding system

Remote control:

Agrologic WebChick program:

- Local computer
- Internet based access
- Cellular access
- SMS alarm messages

TECHNICAL SPECIFICATIONS:

- 9 Analog Inputs
- 2 Analog Outputs
- 10 Digital Inputs
- 24 Dry contact relays 230V/2A
