

ECM12 EGG COUNTER

ECM12 is a stand-alone egg counter display and egg data controller designed to work together with Accucount Mark 5 and N20/40/50 egg counters.

- * The unit is sophisticated, yet very user friendly. The controller, combined together with the Accucount egg counting devices are a must for table and breeder laying installations.
- * The ECM12 records and displays input from up to 12 Mark 5 eggcounters, or a combination of Mark 5 and N counters.
- * The ECM 12 display shows daily and total egg counting for each individual egg counter. All information is stored for up to 7 days in the unit's memory.
- * Information for each egg counter can be seen individually or combined into groups.
- * All information can be transferred to a central Windows based computer for complete and central egg management.

egg counter

TECHNICAL SPECIFICATIONS:

- Power supply: 220V AC
- Inputs: 12 digital inputs
- Outputs: 12V AC power supply for egg counter
- Display: LCD 16 x 2
